Cruzer® Professional
USB Flash Drive for Businesses

USB flash drives are great for taking data everywhere. But their portability makes them susceptible to loss and theft, unacceptable risks for sensitive business information.

Cruzer® Professional USB drive gives business professionals the freedom of a USB drive without the worry. It employs powerful security to protect the most sensitive data. You can create a private, password-protected partition in the drive to store confidential data, and store less sensitive information in a public area for easy access and sharing.

Tight Security, Superior Speed

Unlike most flash drives that tout security, the ultra-strong encryption offered by Cruzer Professional is hardware based. It provides tighter security for your data than software-based methods, since all security measures are implemented on-board by the drive and not by the operating system. Its sophisticated security features include lockdown mode when it detects hacker-like behavior, such as consective wrong password attempts.

These tough security measures do not reduce the speed of Cruzer Professional, which boasts exceptionally fast transfer rates: 24MB/sec Read and 20MB/sec Write.[1]

Inherent Simplicity

Cruzer Professional is a true plug-and-play device, requiring no driver installation or special usage rights. This allows you to use your public and private data on PCs outside the office quickly and effortlessly. Simply plug in your Cruzer Professional to access your public files, or run the on-board Cruzer Professional application and enter a password to access private information.

Product Highlights

- Applies powerful, hardware-based encryption
- Provides configurable private partition
- Achieves ultra-fast transfer speeds

Cruzer® Professional
USB Flash Drive for Businesses

Specifications

Product Features

- Strong hardware-based encryption (256-bit AES), independent of operating system

- Password-protected area for sensitive files

- Device lockdown mode after a preset number of incorrect password attempts

- Ultra-fast transfer speed: 24MB/s Read, 20MB/s Write[1]

- Enhanced for Microsoft® Windows® ReadyBoost™

- Available in 1, 2, 4 and 8GB[2] configurations

Supported Platforms[3]

- Microsoft® Windows® 2000 SP4 or higher

- Windows XP SP1 or higher

- Windows 2003 server

- Windows Vista

Note: No security technology can be guaranteed to be 100% secure and as such SanDisk cannot guarantee that your data will be secure from unauthorized access, disclosure, alteration or destruction.

[1] Based on internal testings; performance may be lower depending upon host device. X= 150 KB/Sec.

[2] Note: 1 megabyte (MB) = 1 million bytes. 1 gigabyte (GB) = 1 billion bytes. Some capacity is not available for data storage.

[3] No driver installation required.
